

Turbine Model No. 306

New Insect Control Air Extraction Technology to suit Agricultural & Large Commercial Use

Turbine Insect Killer from Pureheat is the latest in insect control and uses no chemicals or pesticides which may harm animals or humans. Insects are drawn to the high-output UV-A lamps where they are then sucked in by the electric fan and captured in the collection bag. Subsequently, the insect cannot escape and dies of dehydration.

Turbine is IPX4 rated for external use and is ideal for farm applications or outdoor hospitality areas.

- Large Area Attraction
- No Odours, No Chemicals.
- Non-Corrosive Aluminium Body
- Safe – No Smoke, Radiation or Electromagnetic Waves
- Easy Wall Fixing
- 2 Year Warranty*

Effective Range (Rad.) 15 – 18 metres

Specifications	
Dimensions (mm)	407 x 356 x 941 H
Weight	11.0kg
Input Voltage	240v /50Hz
Power Consumption	165W
Lamps	2 x 40w UV-A
Lamp Life	2000 hr rated
Fan Speed	1000 rpm
Air Intake volume	4 m/sec
Insulation	Class 1
Protection Level	IPX4
Material	Aluminium Body

Turbine Applications include:

- On-Farm Dairy
- Food Production
- Food Handling
- Food Courts
- Outdoor Hospitality
- Equestrian Centres

372/397 Spares

0802	40W UV-A Lamp
002869	Net Collection Bag
