

Construction:

Body:	Fabricated 'Zincseal' sheet, powder coated white.
Thermostat:	Single pole, pre-set type.
Wiring:	150 Degree, silicon wire with (120 c) insulating "Boots" in all high temp areas.
Fasteners:	Zinc passivated.
Timer:	Single pole, 15amp, 3hr wind back.

Dimensions:

Width:	180mm
Height:	85mm
Depth:	55mm

Features:

- Pre-set tamper proof thermostat.
- 3hr timer saves energy – ideal for schools.
- Restricts operator control.
- Simple mounting.
- Use single unit to operate multiple heaters (Note: Relay may be required).
- Rugged, strong steel casing.

Model available:

Rating	Catalogue No.	Product Code
15 amp	HM7B	3800 00 002

Method of operation

The timerbox can be used for remote control of all Pureheat Highmount models. Simply turn the timer to any setting between 0 & 3 hours and the heater will operate for that time and automatically turn off. The overriding thermostat in the HM7B will cut power to the total Highmount system when the pre-set temperature is exceeded (approx. 24c), during operation on the economy element. (note: 4.5kw unit and multiple units equating to over 3.5kw require relay).
